5.5.2.1	Storm selection 132
5.5.2.2	Data quality control 133
5.5.2.3	Storm analysis and gridding 133
5.5.2.4	Storm temporal distributions 133
5.5.2.5	Depth–area–duration analysis 134
5.5.2.6	Storm dewpoint temperatures 134
5.5.3	Generalizing the storm database 135
5.5.3.1	Regions, zones and homogeneity 135
5.5.3.2	Depth–area–duration analysis 135
5.5.3.3	Topographic enhancement of rainfall 135
5.5.3.4	Moisture maximization and standardization 136
5.5.3.5	Geographic variation in decay of storm mechanism 138
5.5.3.6	Enveloping the depth–area–duration curves 139
5.5.4	PMP estimation technique for a particular watershed 140
5.5.4.1	Catchment area and location 140
5.5.4.2	Convergence component PMP estimates 141
5.5.4.3	Estimating the topographic component of the PMP storm 141
5.5.4.4	Catchment PMP estimates 142
5.5.4.5	Design spatial distribution of the PMP storm 142
5.5.4.6	Design temporal distribution of the PMP storm 142
5.6	GENERALIZED ESTIMATION OF 24-HOUR POINT PMP IN CHINA 142
5.6.1	Brief introduction 142
5.6.2	24-hour extraordinary precipitations in China 143
5.6.3	Maximization method of meteorological factors of storms 144
5.6.4	Statistical estimation method 144
5.6.5	Storm frequency estimation method 144
5.6.5.1	Storm data 144
5.6.5.2	Return period 144
5.6.5.3	Frequency curve and statistical parameters 144
5.6.5.4	Drawing the storm frequency isoline map 144
5.6.6	Drawing 24-hour point PMP isoline maps 145
5.6.6.1	Analysis and determination of statistical results 145
5.6.6.2	Steps in drawing isoline maps 145
5.6.7	Application of the 24-hour point PMP isoline map 145
5.7	NOTES 145
CHAPTER 6. ESTIMATES FOR TROPICAL REGIONS	147
6.1	MODIFICATION OF COMMON TEMPERATE-LATITUDE PROCEDURES 147
6.1.1	Meteorological storm analysis 147
6.1.2	DAD analysis 148
6.1.3	Moisture maximization 148
6.1.3.1	Sea-surface temperatures 150
6.1.4	Wind maximization 150
6.1.5	Storm transposition 150
6.1.6	Sequential and spatial maximization 152
6.2	PMP ESTIMATES FOR INDIVIDUAL REGIONS 152
6.2.1	Hawaiian Islands PMP 152
6.2.1.1	Non-orographic PMP 153
6.2.1.2	Slope intensification of rainfall 153
6.2.1.3	Generalized PMP estimates 153
6.2.2	PMP for the lower Mekong River basin in South-East Asia 154
6.2.2.1	Mean seasonal precipitation map 154
6.2.2.2	The typhoon as a PMP prototype 155
6.2.2.3	Adjustment of United States tropical storm rainfalls 155
6.2.2.4	Adjustment of Viet Nam tropical storm rainfalls 156
6.2.2.5	Generalized estimates of PMP 159
6.2.2.6	Time distribution 159
